

# The SDF.Finance "Mini Manifesto"

## The 4 Pillars Of SDV.Finance

Charity | High Yield Staking | Auto Compounding | Custom Swapping  
Platform With Unique Features Never Incorporated Before

### Let's start with the charity piece ...

We're partnering with some of the leading global organizations that are helping victims of domestic violence. We don't just cut them a check that's too easy and NOT in full alignment with our vision.

We'll be using their resources, their network, their contacts and much more to be able to provide victims of abuse with counseling and therapy related services.

**The next piece we've integrated is staking.** Not your average staking platform though. This is staking on steroids. Projects have been vetted to ensure they're safe and that there is no risk for a rug pool (or any of the other shenanigans that unfortunately take place in this great industry).

Not only will you be able to safely stake your tokens, but you'll be doing so at rates that most investors only dream about. Forget about putting funds into a bond, savings account, CD or generating dividends in the stock market. Yawn. We're talking about 20, 30, 60 ... even 150% or more APR.

Safe Funds + Insane Yields = Happy Investors.

### Let's move on and address the Auto Yield function of the token ...

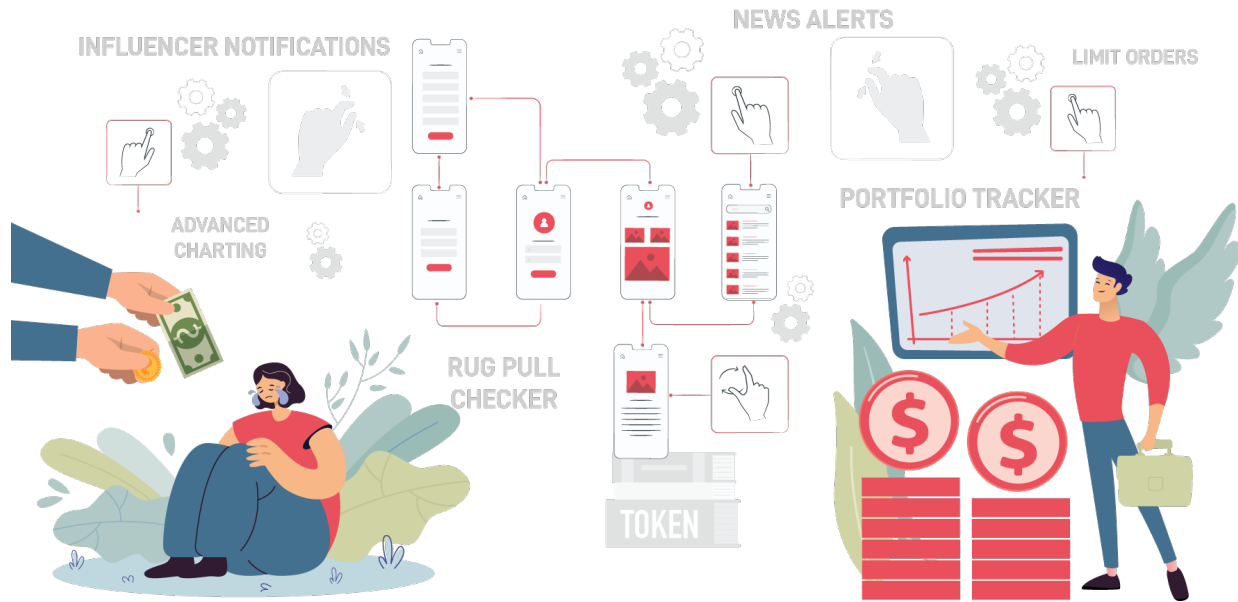

With each transaction, there is a 6% tax that is assessed. Out of that, a staggering 4% is automatically redistributed to holders. You got it ... your investment grows while you hold. Nothing else is needed on your part.

You don't have to use a pool, a farm or anything else - kick back, throw your feet up and watch the amount of coins you own increase - in direct proportion to the size of your bag.

Your \$SDVF holdings grow automatically.

**And Finally, A Never Seen Before, 100% Unique Swapping Platform With More Features And Ways To Profit Than You'll Know What To Do With ...**

## CHARITY | HIGH YIELD STAKING | CUSTOM SWAP PLATFORM

One of the most exciting pieces of this project is the swapping platform that we're building from the ground floor.

When we first decided to build this, we asked ourselves one simple question ...

"If we're building it from scratch, what do we want it to be capable of doing?"

**Here are just SOME of the features...**

- Influencer notifications when new content is uploaded (giving you a first mover advantage)
- Limit orders/emergency exits/ "if/then" trades when conditions are met
- News/media alerts
- Real time portfolio tracking (data is not delayed)
- Advanced charting
- One click rug checker
- Notifications when LP is added (new coins launching)
- Whale order notifications (you establish what constitutes the order size)
- Abnormal trading volume alerts
- Stop and trailing losses
- Token scanner/finder tool
- Newly listed tokens

And so much more...

There's more than 40 features built into this hog ... just waiting for your grubby little paws to get on it.

"When you bring the right team together who genuinely wants to disrupt an industry and you combine that with talent and an

unwavering passion to succeed, great things are going to happen”.

Duff / SDVF, Captain Of Marketing

### The Tokenomics... And How We Plan To Create Wealth For Hodlers.

#### 6% Tax on buyers and sellers

- 1% Charity wallet
- 1% Marketing wallet
- 4% Redistribution to holders.

**Total coins: 1,000,000,000,000 (1 Trillion):**

45% in the contract

41% (410 Billion burned at launch)

5% Team Wallet (project, contests, airdrops, and exchange listings).

3.2% in liquidity (burned)

And, we have self funded 100% of the project. Launch was a fair sale. No ICO. No presale. We are COMPLETELY funding this out of our own pocket.

### Here's Where We're Heading ...
